(a) Raw model probabilities
perfect calibration
Logistic regression (ECE 0.008)
k-NN (ECE 0.008)
Random forest (ECE 0.009)
Gradient boosting (ECE 0.005)
observed subscription fraction
mean predicted probability (10 equal-width bins)
0.0
0.2
0.4
0.6
0.8
1.0
(b) After isotonic calibration
perfect calibration
Logistic regression (ECE 0.003)
k-NN (ECE 0.002)
Random forest (ECE 0.004)
Gradient boosting (ECE 0.005)
observed subscription fraction
mean predicted probability (10 equal-width bins)
